

# Regular Expressions

[regex101.com](http://regex101.com)

## Character Set / Classes

|               |                                 |
|---------------|---------------------------------|
| <b>[abc]</b>  | Matches any character – a, b, c |
| <b>[^abc]</b> | Except a, b, c                  |
| <b>[a-z]</b>  | Alphabet from a to z            |
| <b>[A-Z]</b>  | Alphabet from A to Z            |
| <b>[0-9]</b>  | Digits                          |

## Group (...)

|                |               |
|----------------|---------------|
| <b>(a   b)</b> | Either a or b |
|----------------|---------------|

## Quantifiers

|                |                                             |
|----------------|---------------------------------------------|
| <b>.</b>       | Occur one time                              |
| <b>?</b>       | Occurs zero or one time                     |
| <b>+</b>       | Occurs one or more times                    |
| <b>*</b>       | Occurs zero or more times                   |
| <b>{n}</b>     | Occurs n times                              |
| <b>{n ,}</b>   | Occurs at least n times                     |
| <b>{n , m}</b> | Occurs at least n times and at most m times |

## Meta Characters

|           |                      |                              |
|-----------|----------------------|------------------------------|
| <b>\d</b> | <b>[0-9]</b>         | Digits                       |
| <b>\D</b> | <b>[^0-9]</b>        | Not Digits                   |
| <b>\w</b> | <b>[a-zA-Z0-9_ ]</b> | Word                         |
| <b>\W</b> | <b>[^\w]</b>         | Not Word                     |
| <b>\s</b> | White Space          | Space / Tab Space / New Line |
| <b>\S</b> | Not a White Space    |                              |

## Pattern Modifiers (flags)

|          |              |
|----------|--------------|
| <b>g</b> | Global Match |
| <b>i</b> | Ignorecase   |
| <b>m</b> | Multiline    |

## Anchors (Positions)

|           |                    |
|-----------|--------------------|
| <b>^</b>  | Starting Character |
| <b>\$</b> | Ending Character   |

### Note:

Every regex starts and ends with / (forward slash)

\ (backslash) can be used for escaping the sequence
